

RAOB Friends & Users:

You have received this message because you are a RAOB owner or friend. If you received this message in error or no longer desire to receive these messages, just respond to this message by indicating REMOVE in the Subject or Body of this message.

For RAOB 6.1 users only. The latest version contains serial numbers beginning with 6171, so if the first 4 digits of your RAOB serial number are less, you should download the latest program update using RAOB's Help menu (RAOB Program Updates) for the download link. This update contains three changes: (1) it corrects how the program configuration folders are identified and managed, (2) it corrects the Listing's 'Interval Listing' for soundings containing only wind data, and (3) it corrects a CSV Decoder problem with Kelvin data.

Customer Corner. Bob Hartig (sax player and storm chaser) uses RAOB imagery in his storm-chasing blogs. For added contrast he likes to use the 'black' screen background, which can be found under the Program Options menu. Here is one of his blog entries . . .

The RAOB 6.2 Beta program. The developing RAOB 6.2 program is going vertical with its new capability to process vertical wind (W) component data, such as that found in Sodar & Lidar data. Here is a sample image of the new UVW screen designed to display this component data... [http://www.raob.com/pix/RAOB\\_UVWsonde\\_Lg.jpg](http://www.raob.com/pix/RAOB_UVWsonde_Lg.jpg) If you have made a RAOB 6.1 purchase, you are eligible to use the 6.2 Beta program now since you will be eligible for this free upgrade when RAOB 6.2 is released later this year. If you want to use the RAOB 6.2 Beta program now, or are not sure of your eligibility, just contact [wxx@raob.com](mailto:wxx@raob.com) and provide your RAOB serial number. Use the below link to view the growing list of RAOB 6.2 Beta enhancements... <http://www.raob.com/raob62beta.htm>
