RAOB Friends & Users:

You have received this message because you are a RAOB owner or friend.
If you received this message in error or no longer desire to receive
these messages, just respond to this message by indicating REMOVE in
the Subject or Body of this message.

For RAOB 6.2 users only. The latest version contains serial numbers
beginning with 6261, so if the first 4 digits of your RAOB serial
number are less, you should download the latest program update using
RAOB's Help menu (RAOB Program Updates) for the download link, or just
use this direct link: http://www.raob.com/filelinks/raob62update.htm

This update contains several corrections and changes to the Basic
program and the Analytic & Cross-Section modules. The changes are
listed on the update link. There has also been a major update to the
program's entire Help file system. Of particular note is the new
'Current Display' Help option immediately below the 'Main Menu' Help
option. When present, this 'Current Display' Help option directly
presents specific information about the active screen, such as Winter
Weather, Scanner Screen, and other unique RAOB display screens.

Customer Corner. This customer used RAOB's abilities to overlay
multiple soundings: http://homepages.vvm.com/~curtis/TCTor/TCTor.pdf
Beginning with the current RAOB 6.2 program, you can now overlay up to
2,000 soundings in the new Scanner Display mode as seen here:
