RAOB 6.6 Beta program. The RAOB factory has just added a manual X-Axis scaling option for the Soundingram module (<http://raob.com/assets/images/SoundingramScale.jpg>), and enabled the Advanced Merge module to merge wind-profiler Hi/Lo couplets with time-intervals of less than 1-minute (http://raob.com/mod_merge.php). If you have made a RAOB 6.5 purchase, you are eligible to use the v6.6 Beta program now since you will be eligible for this free upgrade when RAOB 6.6 is released later this year. If you want to use the RAOB 6.6 Beta program now, or are not sure of your eligibility, just contact wxx@raob.com and provide your RAOB serial number.
