

RAOB Friends & Users:

June 2017

You have received this message because you are a RAOB owner or friend. If you received this message in error or no longer desire to receive these messages, just respond to this message by indicating REMOVE in the Subject or Body of this message. All other communications must be sent to wxx@raob.com

For RAOB 6.7 users only. The latest version contains serial numbers beginning with 6762, so if the first 4 digits of your RAOB serial number are less, you should download the latest program update using RAOB's Help menu (RAOB Program Updates) for the download link, or just use this direct link: <http://raob.com/filelinks/raob67upgrade.htm>

RAOB User Hint. Even though RAOB produces over 100 atmospheric parameters (both profile & thermodynamic), RAOB's optional Advanced Export Module gives the user an infinite number of atmospheric layer diagnostic options -- for both temperature and wind profiles. This is done using Tab 5 (Mean Layers and Levels) of the Export form, which is discussed here with all the other Tab options (click on any Tab image to expand view) >
http://www.raob.com/mod_export.php

RAOB Customer Quote of the Month, 'Your customer service is top notch and really not matched by anyone I do business with!'

RAOB Customer Corner. This NTSB Accident Report includes a RAOB profile >

RAOB 6.8 Beta program. The Beta continues to grow, and now includes the new Key West Waterspout index, and the new Pisharoty Sonde decoder (which processes advanced radiosonde profiles of the Indian Space Research Organization [ISRO]'s Vikram Sarabhai Space Centre [VSSC] program). If you have made a RAOB 6.7 purchase, you are eligible to use the 6.8 Beta program now since you will be eligible for this free upgrade when RAOB 6.8 is released later this year. If you want to use the RAOB 6.8 Beta program now, or are not sure of your eligibility, just contact wxx@raob.com and provide your RAOB serial number. Use this link to view the complete list of RAOB Beta enhancements >
